

CSU COLLEGE OF LAW  
Global Space Law Center

THE 2023 GSLC SYMPOSIUM:  
**LAW & POLICY ISSUES IN THE NEW ORBITAL ECONOMY**

April 12, 2023  
1 p.m.-5:30 p.m. EST

As private industry takes the lead in the use of Earth's orbits, entirely new sectors of the orbital economy are emerging. The coming years will see the development of private space stations, on-orbit repair and refueling, orbital tourism, and an increasing number of megaconstellations. This symposium presents five moderated panels on the law and policy issues stemming from the orbital revolution.

**Program**

- 1:00 p.m. Welcome by Dean Lee Fisher
- 1:10 p.m. Opening Remarks by Prof. Mark J. Sundahl
- 1:30 p.m. *Space Traffic Management*
- Richard Dalbello, Department of Commerce, Office of Space Commerce
